Sheavers Creek Water and Sewer District
P.O. Box 1015
Bigfork, MT 59911

Dear Gentlepersons,

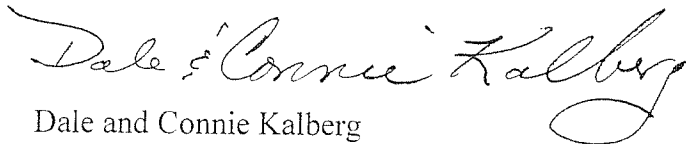

Dale and I will be unable to attend the meeting of January 11th, but wanted to let you know that we would like to be included in the study area. Our home is just outside the current Sheaver's Creek Water District to the north.

We are also owners of two lots in the Sheaver's Creek Water District and are excited about the prospect of having a sewer system there some day.

We are very concerned about ground and surface water degradation, and particularly concerned about protecting the water quality of Flathead Lake. Flathead Lake is the jewel of Western Montana and is critical to the economy of these areas.

We are encouraged that there is support for expanding the study area. This would certainly be better for our environment and would spread the fixed costs across more properties. Given the efforts that go into such an undertaking, it seems to make sense to include as many properties as possible and the more properties on a sewer system, the better for Flathead Lake.

Thank you.

Dale and Connie Kalberg
